BYRDCLIFFE Audio Upgrade Project *Byron Frayne 845.706.9233*

Based on my live sound engineering and studio sessions at several venues in the area, the items below are what I'd suggest for your venue. I highly suggest the larger MIDAS M32 console (over the compact version M32R) as it's wonderful to work on. Both consoles are shown and linked below.

Sound Boards to consider:

MIDAS M32 - full size, many features

(front view - 24 faders, full control))

(back view - I/O)

MIDAS M32R - more compact, less features

(front view - 16 faders, compact workspace)

(back view - less I/O)
